How Our Blue Jackets Upheld American Liberty of Conscience at Marseilles.

churches. As they left the sacred edifice in a body, they were jeered at and insulted by the riffraff in the street, sulted by the riffraff in the street.

The antagonism of the last twenty-live years, nor is any soldler allowed to speak to the half dozen Benedictine monks who constitute the staff of the church.

The antagonism of the government expectation of the government expectation of the church.

If I call attention to this little episode, which the people of these two countries are subjected by their respective governments in religious decadence, the state, curiously enough, is mainly responsible. In the case of certain nations, especially those case of certain nations, especially those in the state has a right to confiscate the property of the church, of the end to these offensive and false views of France and Italy, it endeavors to fos-ter materialism and atheism, by the intolerance which it displays toward everything connected with the church. In fact, people in America who have not lived abroad, have no idea of the length to which this intolerance is carried by governments which are apparently blind to the fact that our entire modern civilization, our whole system of law and order, are primarily based on religion. The destruction of the latter means the annihilation of the very foundation of the authority of the state

In France, officers of the army are pen-alized for sending their children to Catholic schools, and even for attending mass; a Protestant as M. de Pressense, being the dismissal of four of his officers, including the two lieutenant colonels, to other garrisons, for no other cause than to compel him to submit his children to the Cathedral of Laon.

The recent disputes between the French future in this world and in the next. government and its postal employes, brought to light a number of cases of in the religious services; while another

officers at Bordeaux received peremptory glous belief, as in France and in Italy. been made by the head of the People's Instructions forbidding them to attend the Looking at the matter from a purely Institute in New York to introduce them

the British military authorities sent a priest 700 miles by special train to hear the confession of a dying Irish soldier: and here in America, whenever any fatal accident happens, way is at once made even through the densest crowd for the priest, while every one, be he Catholic, Protestant, Jew, Mormon, or agnostic maintains an attitude of profound respect and even reverence, while the last rites of the church are being administered to But in France, when a soldier or a sail-

or is stricken in the performance of his cuty, the priest is barred from his side distress of feeling that he has passed without receiving those religious ministrations which they consider so in dispensable to eternal salvation.

Time and again have cases of this kind been reported to Parliament. In some of them the excuse has been given that if the priest was barred, it was because the dying man had not asked for him. But in each of these cases it was shown that the injuries sustained were of such a nature as to deprive the dying man of could be put forward with regard to the the terrible explosions on board the Couronne and the Le Touche Treville at Toulon, and who, as they lay dying, shockingly maimed, cried in vain for a priest, all of whom were prevented by armed force from responding to the call. Parents, too, are deprived of any voice in the education of their children, and are punished, not only by fine, but also by imprisonment, if they offer objections to their youngsters having placed in their hands by the school authorities, books approved by the latter, in which not merely the church to which they belong but even Christianity, are derided and

As an illustration of what this means I need merely recall the comparatively recent incidents at St. Pierre Micquelon, a tiny French possession on this side of the Atlantic, and where in 1903 the governor, in obedience to orders received from Paris, closed the college long maintained there by the clergy, and established in its stead a purely secular school. to which the inhabitants, most of them of Breton origin, were forced by law to send their children, and in which religion was not only barred, but denounced and ridi-

As the result of this, one-third of the population of the island emigrated. The remaining inhabitants, horrified by the character of the instruction received by their children, thereupon subscribed funds for the establishment of a free school. But as soon as the two teachers engaged for the purpose had entered upon their duties, they were arrested, fined, and expalled from the island, and the school closed by the governor. No wonder that under the circumstances the inhabitants broke out in revolt, clamored for annexation to the United States, and marched ssion to the American consulate, waving the American flag, and cheering "the United States and liberty!"

In Italy very much the same condition of affairs prevails, and the government seems bent on completely de-Christianizing the peninsula. In the army, not only

of which, curiously enough, no mention has been made as yet in the American press.

As an illustration of the attitude of the authorities, it may be mentioned that although a detachment of 400 soldiers are stationed in the ex-convent of St. Giorgio Maggiore at Venice, and although the church attached to that once glorious monastery is always open for public worship, not a single soldier had attended in port to attend mass in one of the attitude of the attitude of the inauguration of Christianity, can the new regime be regarded as lasting, in the Land of the Rising Sun.
